3059. SHRI KRISHNA KUMAR BIRLA: Will the PRIME MINISTER be pleased to state:

(a) whether almost all the existing atomic power plants in the country have been continuously facing trouble and with the plants under construction running behind schedule a massive shortfall in nuclear power target set for 2004 AD is anticipated;

(b) if so, what is the average percentage of the nuclear power production as against the capacity during the last three years year-wise in respect of each of the atomic power plants, stating the major constraints for the unsatisfactory performance; and

(c) what is the estimated cost escalation in respect of each of the ongoing atomic power plants in the country stating the period by which their completion has been delayed and the reasons therefor?

THE MINISTER OF STATE IN THE MINISTRY OF SCIENCE AND TECHNOLOGY AND MINISTER OF STATE IN THE DEPARTMENTS OF OCEAN DEVELOPMENT ATOMIC ENERGY, *ELECTRONICS AND SPACE (SHRI* K. R. NARAYANAN): (a) The two units of Tarapur Atomic Power Station and Rajasthan Atomic Power Station Unit-II are operating satisfactorily. Rajasthan Atomic Power Station Unit-I is not operating owing to development of cracks in its southend shield. After initial satisfactory operation, both units of Madras Atomic Power Station faced problems connected with conventional equipment such as turbo-generator vibrations and transformer failure, which have been overcome. In addition, Madras Atomic Power Station Unit-II encountered a problem with its fuel transfer system which has been attended to. Amongst the projects under construction only Narora Atomic Power Projects is not progressing as per schedule. Work has commenced on Rajasthan Atomic Power Project Unit-III and IV and Kaiga Atomic Power Project. Given adequate financial inputs, it is feasible to achieve the target of 10,000 MWe set for the year 2000 A. D.

(b) Average percentage of Nuclear power production as against the capacity during the last three (year-wise) years in

respect of each of the atomic power plant is given below:

Year	Unit	Installed Capacity (MWE)	National Generation at full capacity (million Units)	Actual Generation (million Units)	Capacity Utilisation (%)

*From 26-1-1984
**From 20-3-1986
@Derated to 160 MWe w.e.f. 1-4-1985

Causes for under utilisation of the capacity include the following:

(i) Equipment problems such as reduced capacity of secondary steam generators at Tarapur, repeated turbine blade failures at Rajasthan, turbo generator vibrations and failure of main transformer at Madras.

(ii) Non-functioning of RAPS-I since March 1982 due to end shield problem.

(c) Information in respect of ongoing projects is given below:

Cost: (Rs. in crores)

	NAPP	KAPP	RAPP 3 & 4	KIAGA
Original estimated cost	209·89	382·52	711·56	726·63
Present estimated cost	537·84	690·89	711·56	726·63
SCHEDULE

Expected date of completion	1988-89	1990-91	1994-95	1994-95
Extent of slippage	7 years	NiL	NIL	NIL
